EDUCATION

OmDayal Group of Institutions – Engineering and Architecture

Bachelor of Science in Computer Science, July 2024

CGPA: 9.12

EXPERIENCE

Software Engineer Intern | NrXen- IT Technologies: Dec 2022 – Jun 2023

- Designed GraphQL queries to create read update and insert data maintaining the integrity and durability of the data inside database
- Implemented role based login on the web app enabling different kinds of users to get different views of the same page
- Built live vehicle tracking system using Google Maps Api and Leaflet js
- Designed scripts to convert CSV data to objects and insert bulk data at once inside PostgreSql database

Web Developer Intern | Modgenics Technology Solutions: Aug 2023 – Nov 2023

- Developed and maintained RESTful APIs to facilitate seamless communication between the frontend and backend components.
- Collaborate closely with frontend developers for seamless API integration
- Craft well-structured and normalized database schemas for optimized data integrity and query performance
- Develop and maintain comprehensive API documentation aligned with evolving requirements.

PROJECTS

Chat-App / Web App (Express.js, Node.js, HTML, CSS, Javascript, MQTT) • MQTT based chat application

- Pub-sub technique is used where a MQTT broker connects a publisher and subscriber to exchange data • Multiple subscribers or users connects to the same publisher to receive data
- text data up to 5mb can be exchanged with ease

Otp-Authentication/Web App(Express.js, Node.js, HTML, Node-mailer, CSS, Javascript) • App built using express js and node which takes data from user via html form and sends OTP to the user as a mail the OTP is cross-checked when user inputs the OTP receive mimicking the authentication process • node-mailer is used to send the OTP to user

- express.js is used to handle the webpages

Blog-site (Express.js, Node.js,HTML,CSS,Javascript)

- Blog-site app built using Express.js to host handle pages and a compose page to display user entered blogs

SKILLS

BACK-END DEVELOPMENT | Javascript, Express.js, Node.js, Mongo db, SQL, GraphQL, Hasura

FRONT-END DEVELOPMENT | HTML , CSS, Bootstrap, React js

DSA | JAVA,Python

SOFT-SKILLS | Team player, Deliver Results, well spoken
